Interpersonal
Skills

Promoting Ethical
Leadership

Preparing for
Strategic
Management

ACCOUNTING AND TAX PROFESSIONAL

AS AN ACCOUNTING AND TAXATION PROFESSIONAL IN INDIA, YOU WOULD TYPICALLY BE RESPONSIBLE FOR A RANGE OF FINANCIAL TASKS INCLUDING:

Bookkeeping: Maintaining accurate records of financial transactions for businesses or individuals. This involves recording income and expenses, tracking accounts payable and receivable, and ensuring all financial data is up-to-date.

Tax Preparation: Calculating and preparing tax returns for individuals, businesses, and organizations. This includes understanding and applying various tax laws, deductions, and credits to minimize tax liabilities while ensuring compliance with Indian tax regulations.

Financial Reporting: Compiling financial statements such as balance sheets, income statements, and cash flow statements to provide an overview of an entity's financial performance. These reports may be used by management, shareholders, investors, and regulatory authorities.

- **Compliance**: Ensuring compliance with various financial regulations, standards, and laws set forth by regulators.
- **Financial Analysis**: Analyzing financial data to provide insights into the financial health and performance of an organization. This may involve comparing financial ratios, conducting variance analysis, and making recommendations for improvement.
- **Budgeting and Forecasting**: Assisting in the preparation of budgets and forecasts to help businesses plan and manage their financial resources effectively. This involves predicting future financial outcomes based on past performance and current market trends.
